

PROBLEMS WITH CHIPS?

WITH HFT AND SCP FROM STAR, THESE ARE A THING OF THE PAST.

NEW

RETROFITTABLE ON ALL
STAR MACHINES*

This revolutionary technology enables you to immediately master chip generation. Thanks to HFT (high-frequency-turning) and SCP (Step-Cycle-Pro) chip problems are a thing of the past. In theory suitable for use with all known materials.

Theoretically, it can be used with all known materials.

* Depends on control type

HIGH-FREQUENCY-TURNING BY STAR MICRONICS

Suitable for almost all types of machining
(interior and exterior processing).

ADVANTAGES

- Controlled chips
- Greater machine availability
- Less action required by operating personnel
- Stable process reliability
- Less heat generation

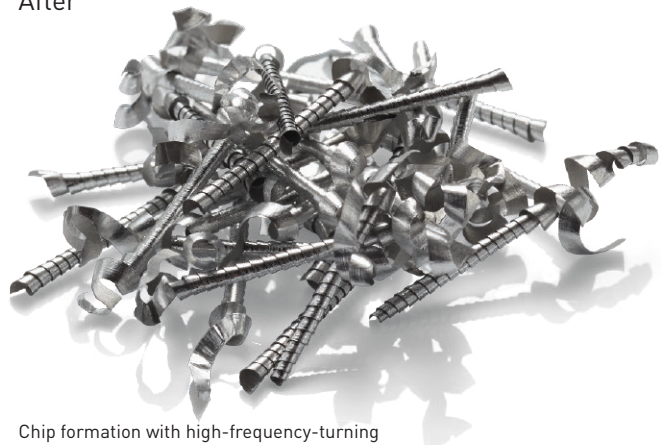

Previous

Chip formation with conventional machining

After

Chip formation with high-frequency-turning

STEP-CYCLE-PRO BY STAR MICRONICS

SCP (Step-Cycle-Pro) is the most recent breakthrough in tackling the challenges that are presented by the awkward chip lengths produced by machining long-chipping materials such as aluminium, stainless steel, copper and plastics.

ADVANTAGES

- Prevents chip problems and significantly reduces rejects
- Uniform surface finish
- Cycle time easy control
- Reduces machine stoppages
- Shortens retooling time
- Easy retrofit at an inexpensive price
- Simple handling with G-code

YOUR CONTACTS

Sales at STAR

**SALES MANAGER
NORTH,
BENELUX (OUDE REIMER BV)**

Herbert Kohlenbeck

Tel. +49 (203) 7297076
Mobile +49 (151) 4021 9062
herbert.kohlenbeck@starmicronics.de

**SALES REPRESENTATIVE
BAVARIA**

Denis Knapp

Tel. +49 (7082) 7920-28
Mobile +49 (151) 4021 9028
denis.knapp@starmicronics.de

**SALES REPRESENTATIVE
BW SOUTH-WEST,
DENMARK (FLEXTEK A/S),
FINLAND, NORWAY,
ESTONIA, LATVIA, LITHUANIA**

Dennis Reiser

Tel. +49 (7082) 7920-32
Mobile +49 (151) 4021 9032
dennis.reiser@starmicronics.de

**SALES REPRESENTATIVE
BW SOUTH-EAST**

Witali Friedrich

Tel. +49 (7082) 7920-46
Mobile +49 (151) 4021 9046
witali.friedrich@starmicronics.de
